CUBA'S SUGAR SEASON ENDS

The Island's Yield will be Between 750,000 and 800,000 Tons.

The sugar season in Cuba may now be considered virtually ended, as the yield of the few estates still grinding will have no appreciable effect on the total production. It is estimated that the yield of the whole island will amount to between 750,000 and 800,000 tons, a very large decrease from the average total production.

The severe drought which has persistently prevailed since October last has not only affected the yield of sugar, but has considerably injured the tobacco crop. In several localities cattle are beginning to suffer for want of water and the grazing fields furnish little nourishment, the grass being practically burned up. - Washington

The Cruiser San Francisco.

There has been some speculation in naval circles as to the purpose of Secretary Herbert in bringing the San Francisco around from the Pacific and making her the flagship of the North Atlantic squadron, just a time when the policy of the department appears to be to distribute the new vessel among the foreign stations. The reason is that the secretary is very proud of the beautiful white cruiser and wished her to take position as flagship of the North Atlantic squadron (for which she is admirably fitted so far as interior accommodations are concerned) in order that in that conspicuous place she might be a present evidence not only to visiting foreigners, but to the people of the east, of the excellent naval construction that is possible on the Pacific coast.

Tourists and others visiting Hilo can find the DAILY ADVERTISER and Hawaiian Gazette (weekly) on sale at the store of J. A. Martin, Waianuenue street.
